

I can complete missing number calculations.

$5 \times \underline{\quad} = 25$

$5 \times \underline{\quad} = 20$

$5 \times \underline{\quad} = 40$

$5 \times \underline{\quad} = 15$

$5 \times \underline{\quad} = 15$

$5 \times \underline{\quad} = 50$

$5 \times \underline{\quad} = 10$

$5 \times \underline{\quad} = 0$

$5 \times \underline{\quad} = 0$

$5 \times \underline{\quad} = 0$

$5 \times \underline{\quad} = 10$

$5 \times \underline{\quad} = 15$

$5 \times \underline{\quad} = 20$

$5 \times \underline{\quad} = 50$

$5 \times \underline{\quad} = 10$

$5 \times \underline{\quad} = 50$

$5 \times \underline{\quad} = 0$

$5 \times \underline{\quad} = 25$

$5 \times \underline{\quad} = 0$

$5 \times \underline{\quad} = 35$

$5 \times \underline{\quad} = 40$

$5 \times \underline{\quad} = 10$

$5 \times \underline{\quad} = 25$

$5 \times \underline{\quad} = 35$

$5 \times \underline{\quad} = 45$

$5 \times \underline{\quad} = 15$

$5 \times \underline{\quad} = 50$

$5 \times \underline{\quad} = 25$

$5 \times \underline{\quad} = 30$

$5 \times \underline{\quad} = 30$

$5 \times \underline{\quad} = 40$

$5 \times \underline{\quad} = 35$

I can complete 5 times table calculations.

$0 \times 5 = \underline{\quad}$

$1 \times 5 = \underline{\quad}$

$2 \times 5 = \underline{\quad}$

$3 \times 5 = \underline{\quad}$

$4 \times 5 = \underline{\quad}$

$5 \times 5 = \underline{\quad}$

$6 \times 5 = \underline{\quad}$

$7 \times 5 = \underline{\quad}$

$8 \times 5 = \underline{\quad}$

$9 \times 5 = \underline{\quad}$

$10 \times 5 = \underline{\quad}$
