# **ONLINE SAFETY FOR UNDER 5s**

# ever some education of soft qui of the soft qu

According to Ofcom's most recent research, a significant proportion of children are already online by the time they start school, with 17% of 5-year-olds owning their own mobile phone and 50% using messaging platforms. As becoming familiar with technology is generally encouraged in younger children - and has been essential for education during the pandemic - it is crucial that trusted adults recognise both the benefits and the risks of infants and toddlers using digital devices. We've compiled our top tips to help the under-5s start their online safety journey.

## USE DEVICES TOGETHER

This lets you monitor and control what your child is using the device for. It also provides the interaction that supports children's understanding of what they're seeing — allowing them to ask you questions, and so on.

# PARENT CODE: \*\*\*\*\*

### BLOCK IN-APP PURCHASES

If your child uses a device that's linked to a payment method (such as a bank card), use the parental controls to block buys from app stores, as well as in-app purchases. That will prevent your child from accidentally spending money while on your device.

### ACTIVATE PARENTAL CONTROLS

Most digital devices have built-in parental controls that can limit the type of content children have access to. If your little one uses any device (even borrowing yours), it's a good idea to explore what controls the device has and enable them whenever they have access to it.

### CHOOSE SAFE APPS AND SITES

There are some fantastic apps and platforms that are specifically designed to be safer for children. Always check the PEGI agerating before downloading an app, and test it yourself before allowing your child to use it.

# MANAGE SCREEN TIME

This can be tricky, especially if your child is interested in a certain video, app or game. Try to agree on some ground rules and get your child into a routine which includes certain times of the day when they go without devices.

### INVOLVE THE FAMILY

If your toddier has older siblings, it's likely that their rules for device use will be different – and that they'll access content that isn't appropriate for younger ones (a particular worry if they share devices). Encourage the whole family to be good rol models and help little ones stay safe onlin

# TALK ABOUT BEING SAFE ONLINE

Just like we teach children about being safe in the real world, we need to educate them about how to stay safe online. Use age-appropriate language to help them understand, and plenty of hand gestures can reinforce what you're telling them.

# IF IN DOUBT, ASK

The easiest way to find out what your child is doing online is usually just to talk about it with them. Developing an open dialogue at an early age heips them grow up feeling objet to talk to you about their digital life – providing opportunities to intervene if you're concerned.

## SET A GOOD EXAMPLE

Let them see you balancing your time online with interacting with people in real life, too.

## SUPPORT CREATIVE & ACTIVE PLAY

Children often learn by watching and copying those around them, and using digital devices is no exception. When you're around your child, try to follow the same rules that you've set for them, let them see you balancla your time o
